

Professional Dental & Orthodontics

## **In House PD Care Plan**

I understand that the Professional Dental plan is not dental insurance, but is a care plan. The plan offers dental services provided by Professional Dental at a discounted rate, but do not include referrals to specialists or other dental providers. Lab Fees may apply to some procedures and are not covered; they are the responsibility of the patient. Prescriptions, bleaching products, fluoride toothpaste and any other medications/products (including nitrous oxide) are not covered, and the patient will pay the prices listed.

Enrollment in a Professional Dental Care Plan is for one contract year, beginning on today's date. Once my contract year is up, it is my responsibility to notify Professional Dental in writing if, for any reason, I do not wish to continue with my membership. If I do not notify Professional Dental of any changes before my one-year anniversary date, I understand my care plan will automatically renew for another year.
